

PatMyBack - Service Overview

PatMyBack is an online student recognition programme for schools which allows parents, teachers and schools to effect long-term positive change in students' motivation, effort and behaviour by acknowledging positive achievement and rewarding it.

Effective Incentives

Key to the success of PatMyBack is making the rewards relevant to your students. PatMyBack allows schools to easily add relevant rewards, and students to pick the ones that appeal to them, ensuring that students are motivated to achieve their goals.

“ Students respond really well to PatMyBack. You can feel them working harder and they really want to earn PatPoints and really appreciate recognition for work done well. ”

Constructive Feedback

When allocating points, teachers can leave comments providing both student and parents with specific information on why the student has been rewarded and how they can improve in future. Such information also serves as an effective record of a student's performance which can be an effective aid in termly performance reviews.

Healthy Competition

As well as charting each student's progress, if desired, PatMyBack allows students to view league tables, comparing their achievements with those of their classmates, introducing a competitive element which further serves to motivate them to achieve.

Parental Engagement

It's been widely recognised that when parents take an active interest in their child's education a significant and positive impact on that child's attainment and progress at school can be seen.

PatMyBack includes a parent portal allowing full visibility of their own child's progress where they can make pledges of further rewards based on achievement.

House Competition

PatPoint totals are recorded for each house, encouraging students to do even better, help their house compete against the rest of the school and win house rewards.

Appealing graphs and a house point history make it all the more compelling for students, parents and teachers.

Hassle Free

PatMyBack is a completely online service. It can be set up and tailored to your school with minimal effort. It undergoes continual development, driven by feedback from our schools.

Teacher Led

From its inception, PatMyBack has been designed with the assistance of teachers to help ensure it remains a practical application for the classroom.

Its user friendly interface is accessible from desktop tablet and mobile ensuring parents, students and teachers can access their PatMyBack account whenever required.
